Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem	I am	I'm trying to	But	Because	Which makes me feel

Statement (PS)	(Customer)				
PS-1	a race strategy analyst for an F1 team	find which tyre and pit stop strategies earn the most points	the data is spread across several sheets, with strategies and pit times stored as text and blank cells for retirements	these fields are not ready for analysis and need cleaning and splitting before any chart can be built	frustrated and unsure whether my conclusions are right
PS-2	an F1 fan who follows the championship	compare drivers and teams across seasons and see who really performs best	it is hard to spot trends in thousands of rows of race results	there is no single visual summary of wins, points, reliability and race conditions	overwhelmed and unable to explain what the numbers mean
