Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	2 November 2026
Team ID	Not provided
Project Name	F1 Racing Data Analytics using Tableau
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)	Priority (High/Medium/Low)
1	Workbook Access	Open the F1 Tableau workbook and use connected championship_standings data.	High
2	Performance Views	Provide driver points, wins, podiums, team points, team poles, and average finish views.	High
3	Reliability & Titles	Provide driver DNF and title views and the team-driver wins heatmap.	High
4	Dashboard Navigation	Present six performance sheets in F1 Performance Dashboard and three views in F1 Reliability & Titles.	High
5	Data Scope	State source file and period; current workbook uses championship_standings only.	High
6	Future Enhancements	Add season filters only after implementation and cross-sheet behavior are verified.	Low

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	Use clear labels, readable chart scales, consistent driver/team names, and descriptive metric titles.
NFR-2	**Data Quality**	Check standings rows, season range, and metric values on refresh; validate other tabs before integration.
NFR-3	**Metric Accuracy**	Use consistent points, wins, podium, pole, DNF, title, and average-finish definitions.
NFR-4	**Reliability**	Keep extract refresh repeatable and document refresh date and failures.
NFR-5	**Performance**	Ensure dashboards open and respond acceptably for the supplied extract size.
NFR-6	**Maintainability**	Keep workbook sheets, source fields, and metric definitions documented.
