Story

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It’s a tool for data storytelling, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

In Tableau, Story is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

Observations:

Technology Category Leads in Profit: The Technology category is generating the highest profit among all categories.

Seasonal Sales Trend: Sales peak in November, while February sees the lowest sales, indicating a possible seasonal trend.

Consumer Segment Dominates: The Consumer segment contributes to the highest percentage of sales, accounting for 50.56%.

Top Revenue-Generating Product: Chairs from the Furniture category generate the highest revenue, totaling 1.66M.

Activity 2:

Publish Story on Tableau Public and Paste Public link below
